Java - Introduction to Programming
Lecture 13

String Builder

Declaration

```
StringBuilder sb = new StringBuilder("Apna College");
     System.out.println(sb);
```

Get A Character from Index

```
StringBuilder sb = new StringBuilder("Tony");
     //Set Char
     System.out.println(sb.charAt(0));
```

Set a Character at Index

```
StringBuilder sb = new StringBuilder("Tony");
     //Get Char
     sb.setCharAt(0, 'P');
     System.out.println(sb);
```

Insert a Character at Some Index

```
import java.util.*;

public class Strings {
   public static void main(String args[]) {
     StringBuilder sb = new StringBuilder("tony");
     //Insert char
     sb.insert(0, 'S');
     System.out.println(sb);
   }
}
```

Delete char at some Index

```
import java.util.*;

public class Strings {
   public static void main(String args[]) {
     StringBuilder sb = new StringBuilder("tony");
     //Insert char
     sb.insert(0, 'S');
     System.out.println(sb);

      //delete char
     sb.delete(0, 1);
     System.out.println(sb);
   }
}
```

Append a char

Append means to add something at the end.

```
import java.util.*;

public class Strings {
   public static void main(String args[]) {
     StringBuilder sb = new StringBuilder("Tony");
     sb.append(" Stark");
     System.out.println(sb);
   }
}
```

Print Length of String

```
import java.util.*;

public class Strings {
   public static void main(String args[]) {
     StringBuilder sb = new StringBuilder("Tony");
     sb.append(" Stark");
     System.out.println(sb);

     System.out.println(sb.length());
   }
}
```

Reverse a String (using StringBuilder class)

```java
import java.util.*;

public class Strings {
   public static void main(String args[]) {
     StringBuilder sb = new StringBuilder("HelloWorld");

     for(int i=0; i<sb.length()/2; i++) {
       int front = i;
       int back = sb.length() - i - 1;

       char frontChar = sb.charAt(front);
       char backChar = sb.charAt(back);

       sb.setCharAt(front, backChar);
       sb.setCharAt(back, frontChar);
     }

     System.out.println(sb);
   }
}
```

Homework Problems

Try Solving all the String questions with StringBuilder.
